

Gulp.

a personal learning system
for the age of information overload

Save anything and you still forget it. Gulp *digests* what you consume into knowledge you can *recall, test, and reuse*.

Forward anything. Gulp turns it into knowledge you can actually remember.

00 WHY THIS MATTERS

The smarter AI gets, the more it does for us — and the less we do for ourselves.

Gulp makes the opposite bet: AI’s highest use is to make the person using it stronger. Same powerful models — pointed at your growth, not just your output. You stay the one who understands.

01 THE CORE LOOP

INTAKE

a universal inbox for anything you consume

DIGEST

AI turns each input into a knowledge pack, not a summary

MASTERY

cards, tested & scheduled until you own it

FORWARD ANYTHING → KNOWLEDGE PACK → 5 MIN IN GULP MODE → MASTERY TRACKED

02 WHY WE WIN

VS RECALL

source management, a daily knowledge stream, a real mastery model

VS READWISE

testable knowledge, not just resurfaced highlights

VS NOTEBOOKLM

a long-term, cross-topic system with real spaced repetition

VS REMNOTE

starts from your real stream, not manual notes

VS CUBOX

active mastery after reading, not just retrieval

VS OBSIDIAN / NOTION / TANA

the system builds itself — no setup, no upkeep

03 MVP — THE SHARP LOOP

01 Universal inbox

links · PDF · video · podcast · audio · screenshots — WeChat, extension, share sheet, email-in

02 AI knowledge pack

summary, background, terms, claims, counter-views, links to prior knowledge

03 Card-based KB

Source · Claim · Concept · Question · Card · Conversation · Insight

04 Gulp mode

daily 5–10 min: new + due reviews, retests, MCQ, explain-it, apply-it

05 Conversation capture

chat any card; on exit, extract new points & corrected misconceptions

06 Mastery + scheduling

right / wrong / fuzzy → interval; FSRS later

NOT, IN v1: a general PKM · a read-later reader · a team tool · a content platform · notes-first.

04 PRINCIPLES

01

Digestion, not collection

02

Mastery is the unit, not the bookmark

03

Forward anything — capture must be effortless

04

The system builds itself

05

Conversations are assets

SUCCESS

*Users return to Gulp mode unforced and get measurably sharper week over week — cards graduated, retention climbing. If people *learn* from Gulp instead of just stashing in it, we win.*
